

## CES System KM

The conventional locking system  
for high standards for industrial buildings

## System description

The CES system KM is a conventional 5, 6 or 7 pin locking system for industrial buildings. Highest locking precision and several layers of security queries ensure optimum protection against manipulation.

A specially formed and patented key tip allows easy insertion of the key into the cylinder. A guiding groove along the entire cylinder plug ensures the positive transfer of the key torque and prevents the key from breaking.

The KM system can be combined with the electronic locking and access control solutions available from CES. For entrances, access roads or company areas where access must be restricted to defined times, electronic locking components are recommended. They allow a flexible granting and withdrawing of access authorizations.

Successful enterprises rely on a brand product made by CES. For reasons of security, we do not quote any references at this point. However, we shall gladly establish contact with users.

# The KM system pursuant to DIN 18252/EN 1303

## Optimum locking security

The KM locking system has 5, 6 or 7 pin tumblers on each side made of hardened steel. In addition, the KM system is characterized by highest locking precision, maximum variability and effective security elements.

## Integrated basic protection against drilling

All cylinders belonging to the KM system offer integrated basic protection against drilling already in the standard design. Drilling is impeded due to the use of different materials, such as hardened steel for key and driver pins. At least one driver pin and all key pins are made of hardened steel. Stepped locking pins which tilt in the event of a drilling attempt prevent the opening of the cylinder.

## Strong nickel-silver key

It is particularly easy to handle and manufactured pursuant to DIN standards. The key shank is at least 14 mm long and perfectly suited for commercial handle sets with cylinder covering. The registered trademark CES is a quality and recognition feature decorating the key shank.

## Security card

Replacement orders and extensions are only possible from CES if the security card supplied with the locking system is presented.

## Accessories and special equipment

- **Modular system possible**

Profile cylinders belonging to the KM system are also available in modular design. This means that – if necessary – the length of the cylinders can be adapted to the thickness of the door on site, saving both time and money.

- **Additional anti-drilling and anti-pulling protection**

For applications in particularly security-relevant areas, the cylinders can be equipped with additional pins and plates in the case and on the cylinder plug face made of hardened steel.

- **Double, half and knob cylinders (910, 9710, 951 1/2, 915)** are also available as VdS certified cylinders of the classes AZ, BZ and BZ+.

- **Version with impact protection**

- **Seawater resistant**

- **Wear-resistant version**

- **Colours**

Cylinders are available in a wide range of colours. Upon request, cylinder halves in modular design can also be supplied in different colours.

- **Furniture and special cylinders**

The CES locking system KM is also suitable for furniture and special cylinders from the CES range.

- **Electronic access solutions**

CES cylinders belonging to the KM system are compatible with all electronic locking systems available from CES.

- **Accessories**

Locking system management software portier®vision

## Selection of designs DIN 18252/EN 1303 compliant

### Profile double cylinder no. 810 KM

Brass, satin nickel-plated

### Profile double cylinder no. 8710 KM

With emergency and danger function  
Brass, satin nickel-plated  
Lockable on both sides

### Free-running profile double cylinder No. 8710F KM

for multipoint locking  
with panic function  
Brass, satin nickel-plated

### Cam cylinder no. 5558/30 KM

Brass, polished nickel-plated  
Locking movement 90°  
Locking direction as desired  
Fitting dimension 25 mm

### Profile half cylinder no. 851 1/2 KM

Brass, satin nickel-plated  
Cam adjustable in 12 positions

### Padlock no. 215 N/58 KM

Lock case chromium velour finish  
Shackle stainless steel  
Case width 58 mm, height 50 mm  
Key removable without locking  
Shackle clearance 35 mm (standard)

### Profile knob cylinder no. 815 KM

Brass, satin nickel-plated  
Locking function on one side,  
aluminum knob on the other side, F1,  
various knob shapes available  
(figure shows shape H)

### Profile insert no. 802/5 KM

Brass, satin nickel-plated  
Locking function on one side,  
dummy cylinder on the other side

#### Basic lengths for profile cylinders:

5 pins:	27.5/27.5 mm
6 pins:	31.5/31.5 mm
7 pins:	35.5/35.5 mm

Further variants are available.  
Also available in British and Scandinavian profile, as well as ANSI cylinder.
