

CES OMEGA FLEX

Radio Switch

Integration into third-party systems

The Radio Switch allows you to easily and conveniently integrate systems of other manufacturers, such as fingerprint scanners or PIN Code systems, into your CES OMEGA FLEX system.

Radio Switch

Application

- Applicable for all CES OMEGA FLEX electronic cylinders and electronic handle sets
- No further programming needed
- Simple coupling via master medium and push button switch in the radio module
- Up to 4 locking devices can be linked [all are released at the same time]

Technical Information

- 4 different radio channels can be set for optimal radio connection
- Range of internal antenna approx. 10m
- Range of external antenna approx. 25m
- Delivery with screw terminals and with solder terminals, see Fig.
- 1 sabotage contact via cover switch
