Selection of designs
DIN 18252/EN 1303-compliant

Profile double cylinder no. 810 RHM
brass matt nickel-plated

Profile double cylinder no. 8710 RHM
with emergency function,
brass matt nickel-plated
can be locked on either side

Profile half cylinder no. 851 1/2 RHM
brass matt nickel-plated
locking cam, adjustable to 12 positions

Profile knob cylinder no. 815 RHM
brass matt nickel-plated
locking function on one side,
aluminium knob on the other side, F1,
available in various knob forms
(shown: H form)

cam cylinder no. 5558/30 RHM
polished brass, nickel-plated,
locking movement 90°,
locking direction as desired,
fitting dimension 25 mm

Padlock no. 215 N/58 RHM
shackle stainless steel,
housing width 58 mm, height 50 mm,
key removable without locking,
shackle clearance 35 mm (standard)

Profile insert no. 802/5 RHM
brass matt nickel-plated,
locking function on one side, other side
without function

CES RHM system
Horizontal reversible key system with
technical duplication protection

www.ces.eu

Subject to technical change without notice · EN · V01 · 07.19
Stable nickel-silver key
The stable nickel-silver key is 3.5 mm thick and thus particularly handy. It is produced in accordance with DIN specifications. The key shank, which is at least 14 mm long, matches commercial handle sets with cylinder covering. Thanks to the specially formed key tip, the key can be inserted into the cylinder without any effort. A guiding groove along the entire cylinder plug ensures the positive transfer of the key torque and prevents the key from breaking.

Security card
CES only processes replacement orders and delivers system extensions if the security card supplied with the locking system is presented.

RHM locking system
- Security scan of the undercut by an additional element
- Profile variants
- Multi-paracentric profile as anti-picking protection
- Locking bar with enlarged locking surface
- Pin tumblers (spring-loaded)
- Anti-drilling and anti-pulling protection in the plug and housing (optional)

The RHM system
DIN 18252/EN 1303-compliant

A guiding groove along the entire cylinder plug ensures the positive transfer of the key torque and prevents the key from breaking.

Security card
CES only processes replacement orders and delivers system extensions if the security card supplied with the locking system is presented.

Modular system available
RHM profile cylinders are also available in a modular system. This means that the length of the cylinders can be adapted to the thickness of the door on-site, saving both time and money.

Optional anti-drilling and anti-pulling protection
Additional pins and plates made of hard metal which are fitted to the front end of the housing and the cylinder plug protect the cylinder from forced break-in methods.

Impact protection design
Seawater-resistant design
Wear-resistant design

Colours
Numerous cylinder colours are available. Upon request, also differently-coloured cylinder halves are available in a modular design.

Furniture and special cylinders
The RHM locking system can also be used to equip furniture and special cylinders from the CES programme.

Electronic access solutions
RHM cylinders are compatible with all electronic CES locking systems.
